

GARDENING

Month Two

Take a look at how all your plants are looking. By now you should see a good amount of growth. The walk ways are filling in a bit more this month and everything should look green and thriving.

FOOD PROOD

- Check for bugs, slugs and such
- Spray Monterey spray with Spinosad if you see potato beetles
- Use DE or Monterey Spray on other items if your seeing bugs and eaten leaves
- Using a hoe make sure to work up your pathways if not covered to minimize weeds
- If you used string to mark your rows you can remove that now
- 1st application of fertilizer if needed
- Pull weeds in between plants
- Replant seeds if needed
- Harvest lettuce, radishes, garlic scapes if appropriate and replant
- Continue trimming & staking tomatoes
- Succession planting of lettuce, radishes, beets
